

CHETAN KUMAR N K

+91 8073110116 | chetannaikchetan8@gmail.com | LinkedIn | GitHub | Shivamogga, India

PROFESSIONAL SUMMARY

Information Science & Engineering student focused on **Machine Learning, Generative AI, Data Analytics, AI automation, and intelligent systems**. Hands-on experience building RAG, computer vision, IoT, API, and workflow-automation projects using Python, FastAPI, n8n, Git, and modern AI tools.

EDUCATION

Jawaharlal Nehru National College of Engineering (JNNCE)

Shivamogga, India

Bachelor of Engineering in Information Science & Engineering

Jan 2023 – Sep 2027

CGPA: 7.57/10 | PUC: 92.00% | SSLC: 91.48%

SKILLS

Languages & Core CS: Python, Java, SQL, OOP, Operating Systems, Computer Networks
AI/ML & GenAI: Machine Learning, Deep Learning, Generative AI, NLP, Computer Vision, LLMs, RAG, TensorFlow, Scikit-learn, OpenCV, LangChain, Agentic-AI
Backend & Automation: REST APIs, FastAPI, Model Context Protocol (MCP), MCP Servers, n8n, Workflow Automation
Data & Analytics: MySQL, Excel, Data Preprocessing, Data Cleaning, EDA, Pandas, NumPy, Matplotlib, Seaborn, Power BI, Tableau
DevOps & Tools: Docker, Kubernetes, Git, GitHub, VS Code, Google Colab, Streamlit, Gradio, Spider,

EXPERIENCE

HackerRank

Remote / Campus

Campus Crew Member

Jun 2026 – Present

- Support student engagement, coding initiatives, and participation in programming and problem-solving activities as a HackerRank Campus Crew Member.

Oasis Infobyte

Remote, India

Data Analytics Intern

Mar 2026 – May 2026

- Performed data cleaning, exploratory data analysis, statistical evaluation, customer segmentation, and sentiment-analysis workflows on business datasets using Python and SQL.

IEEE Computer Society Student Chapter, JNNCE

Shivamogga, India

Active Member

Oct 2025 – Present

- Contributed to technical events and coding activities; supported participant coordination and technical operations for the National-Level AI Hackathon YUGMA TECHFEST 2.0 (2026).

PROJECTS

1. Smart Robo Nurse - Patient Monitoring & Medication Assistance

Ongoing Major Project

Raspberry Pi | IoT | Sensors | Cloud Monitoring | Medication Dispensing | Real-Time Alerts

- Developing a Raspberry Pi-based robotic healthcare assistant for multi-patient hospital environments, combining scheduled medication dispensing with continuous patient vital-sign monitoring.
- Designing real-time health-data transmission to doctors, nurses, caregivers, and guardians with threshold-based alerts for abnormal readings and timely intervention.

2. VideoMind AI - Video & Meeting Intelligence Assistant

GitHub

Python | RAG | LLM | Whisper | LangChain | Mistral AI | HuggingFace | ChromaDB | Streamlit

- Built an AI application that converts YouTube and local audio/video into searchable transcripts and generates summaries, action items, key decisions, and multilingual insights.
- Implemented a RAG pipeline using HuggingFace embeddings and ChromaDB for context-grounded question answering over transcript data.

3. AI Email Assistant - n8n Workflow Automation

GitHub

n8n | AI Automation | Email Automation | Workflow Orchestration | API Integration

- Built an AI email-assistant workflow using n8n to automate repetitive email-processing tasks through trigger-based workflow orchestration and connected service actions.
- Designed modular automation flows for email handling and reusable task execution, demonstrating practical experience with low-code workflow automation and API-driven integrations.

4. AI Assistive Wearable for Visually Impaired

Python | YOLO | Computer Vision | Raspberry Pi | IoT

- Developed a Raspberry Pi-based wearable prototype using a camera and custom-trained YOLO models for real-time object and obstacle awareness to assist visually impaired users.
- Secured **Rs. 10,000 NewGen IEDC funding** for development and prototyping of the assistive technology solution.

AWARDS & ACHIEVEMENTS

- 1st Place - Ideathon, MCE Hassan:** Awarded a **Rs. 5,000 cash prize** for pitching a technical solution.
- 2X-UI/UX Design: 1st Place - UI/UX Design Competition (2026); Runner-up - AURA 1.0 National-Level UI/UX Design Competition, Byte Brigade Club.**
- Runner-up - ISE Branch Hackathon (2026):** Competed in real-world application challenges.
- NewGen IEDC Grant Recipient:** Awarded **Rs. 10,000** for the AID1 assistive device project.
- 36-Hour Anveshana Hack For Hire 2026 - PESITM:** Selected to work with an industry startup team on real-world problem statements.
